## HOW DOES IT WORK?

**Education:** Through free community information sessions, we teach residents about how solar works, what return on investment to expect, and what financing options are available.

**Financing Solutions:** Participants can receive a Federal Tax Credit equal to 30% of the cost of their system, and a \$500 rebate from Focus on Energy. Our MadiSUN team can also introduce you to other financing options that might be available to you.

**Selected Solar Installer:** MadiSUN takes the guesswork out of selecting a solar contractor. Our staff has examined past work and customer reviews to select experienced, reputable, local solar contractors. We will refer participants to our selected installers for specific, in-depth home solar proposals.

## INFORMATION SESSIONS

We've scheduled in-person and virtual information sessions throughout the summer to help you learn more about going solar.

Learn more and register [madisunsolar.com/events](http://madisunsolar.com/events)

## WORKFORCE TRAINING

We've partnered with the Midwest Renewable Energy Association (MREA) to provide free introductory courses to solar technology and working in the solar industry.
